

Drop Payment Terms and Conditions

Adopted by Select Board 4/21/21

The Town of Becket is subsidizing Standard Installations, as defined in the Town Drop Policy, for connections to the Town's Broadband Network during an initial promotional period as described below); you, the owner of the premise, desire to take immediate services and to qualify to receive the Town Subsidy.

You, as the owner of the premise, are responsible for the entire cost of the installation and set-up of the Network connection from the designated point of interconnection at the core network (the MST) to your Premises. The Town is offering a onetime subsidy of up to \$2,000 to be applied against this cost during the construction and initial sign-up period (the Town Subsidy). You are responsible for paying the Town the excess of the actual installation over the applicable Town Subsidy. Both the total estimated cost of installation and the Town Subsidy available for your premises have been identified below. The amount currently identified as due from you on this Invoice is based on that estimate, net of that Town Subsidy. Once the work of installing and setting up your connection to the Network is complete, the Town will receive a final bill from its vendor/contractors for that work. Based on the final cost, you are further responsible for the prompt payment of any balance of that connection cost billed by Becket Broadband (that is, the excess of the actual cost over the estimate). If the actual cost is less than the estimate net of the Town Subsidy, Becket Broadband will refund the amount of that overpayment to you.
