

# Level 2 Drought in Our Region

## Please Conserve Water

To the Becket Community:

The Commonwealth of Massachusetts Drought Management Task Force has advised that our region is experiencing Level 2 Drought conditions ([Drought Status | Mass.gov](#)). It is essential that we employ water conservation measures in order to protect our wells and prevent fires.

Conserving our water will aid in the reduction of water use and safeguard water for essential needs, such as drinking water, fire protection services, habitat recovery and environmental needs, and sustained water supplies. For more information, please visit the Executive Office of Energy and Environmental Affairs' webpages on [indoor](#) and [outdoor](#) water use, and [Drought Preparedness | Water Conservation | Red Cross](#)
